## Fast Company: Satellite imaging startup takes step forward

A Los Alamos startup that uses satellite images to decipher changes on the Earth's surface has received a new round of venture capital. The \$5 million to Descartes Labs is led by Cultivian Sandbox, a venture fund in Chicago focused on agriculture, as well as Crosslink Capital, TenOneTen, DataCollective and ValueStream Labs. Descartes was formed last December by a team of former scientists at Los Alamos National Laboratory. It includes co-founder Steven P. Brumby, a theoretical physicist who led a machine-learning team at LANL for seven years. [Read the full story.](#)
